

The right solution  
**for every care setting**

ARLU, OPENING DOORS IN HEALTHCARE

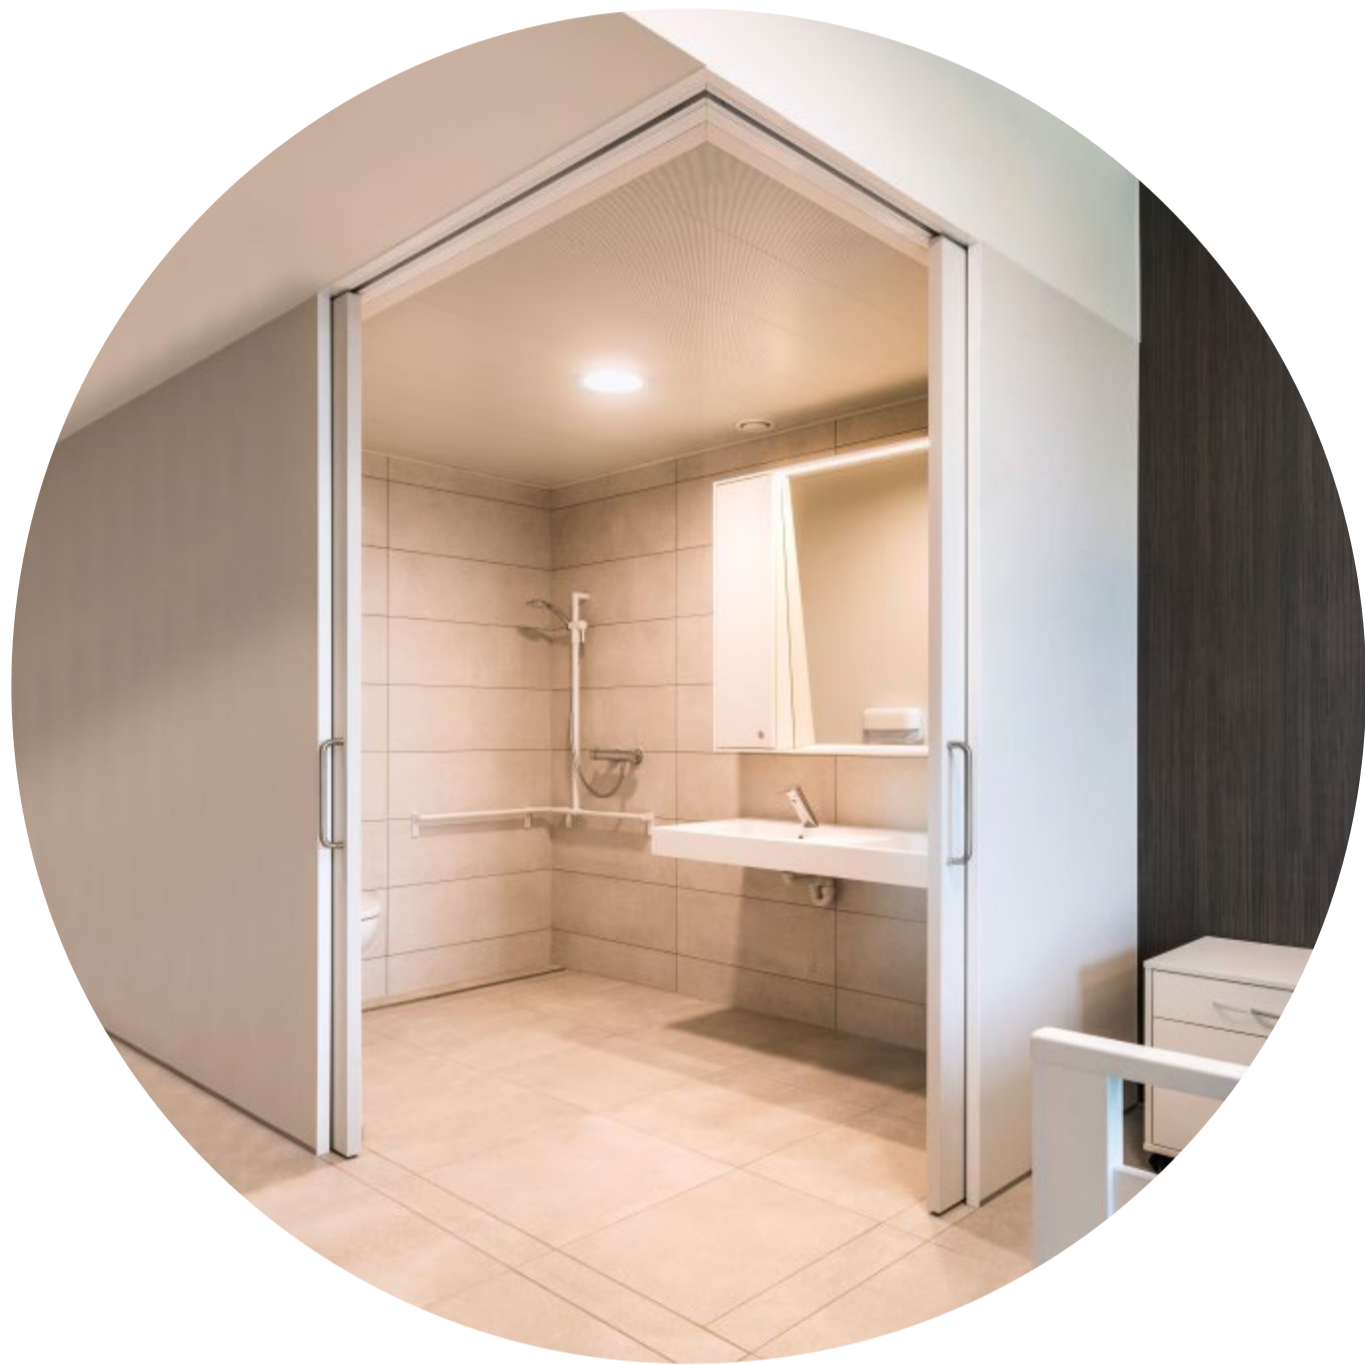

## ARLU helps ensure a safe living environment

Reliable door hardware is crucial, especially in the healthcare sector. ARLU's sturdy door hardware is designed for intensive use and combines durability with smooth rolling movements. This is essential for efficient and accessible room layouts. ARLU's solutions take healthcare environments to the next level.

POCKET

## The ideal space-saving solution for corner sliding doors

In the healthcare sector, it is often a challenge to separate small spaces without compromising on light and accessibility. **ARLU's pocket sliding doors** provide the answer. They slide completely into the wall, providing a compact solution, especially in corner setups. For example, a closed bathroom **remains easily accessible for wheelchair users**. The pocket adapts effortlessly to standard door heights or can also be installed ceiling-high. The system is available for wooden sliding doors up to 120 kg.

POCKET

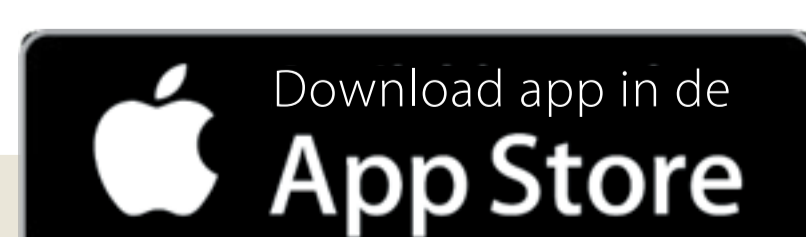

XPERTA + A-SLIDE

## versatile and extremely quiet motorized sliding door system

For residents with limited mobility, opening and closing doors can be physically challenging. **A motorised door** makes it easier to move around the room independently. **The smart motorisation system A-slide makes the Xperta sliding door system operable via a push button, by remote control or via an app.** It makes the Xperta even more user-friendly. By connecting the A-slide to a suitable switch module, you can even integrate the sliding door into a home automation system. Adjusting settings is quick and easy via the handy ARLU® app.

XPERTA

UNISLIDE

## Handy and indispensable fitting system in combination with ARLU sliding doors

---

**Unislide** allows the **sliding door systems pocket and Xperta** to be **seamlessly integrated with lifting systems**. This allows people with limited mobility to easily access different rooms. When opened, Unislide slides completely into the wall, creating a spacious passage. Moreover, the auto-eject function makes it easy to close the door. Thus, **all users enjoy optimum accessibility to spaces**.

INVISIBLE NEO

## Guarantee of fire-resistant doors for an even safer care environment

---

Invisible neo hinges add a touch of sophistication to any room with their sleek aesthetic. With an **opening angle of 180°**, they offer ultimate freedom and ease in opening and closing doors, keeping any room effortlessly accessible. In addition to their elegant design, **invisible neo hinges are also fire-resistant when combined with a fire-resistant door**, and an interdens kit. The invisible neo S5 (suitable for doors up to 60 kg) and neo M6 (suitable for doors up to 80 kg) are suitable for fire doors with a classification EI<sub>1,30</sub>. The neo L7 (suitable for doors up to 100 kg) can be used with fire doors with a classification EI<sub>1,60</sub>.
