OPENING DOORS

ALL TECHNICAL DRAWINGS ARE SHOWN IN MILLIMETRES AND ARE SUBJECT TO CHANGE BY ARLU.

ARLU, THE REFERENCE FOR OPENING DOORS

ARLU® is the manufacturer behind the brand names argenta® and rob®. Argenta has been a leading brand in door hardware for over 100 years, but today it is mainly synonymous with invisible door systems.

Minimalist architecture swears by clean lines and a “back to the essence” mentality. In terms of interior doors, this results in integrated door fittings, invisible integrated techniques, door frames and skirting boards for revolving, sliding and pivoting doors.

Argenta stands for a full range of sleek interior solutions.

FURNITURE HARDWARE FOR WOODEN PANELS

Our furniture hardware can be both top-hung and supported from below, and can handle all commonly used panel thicknesses. Panels can weigh up to 60 kg each, and an endless number of panels can be fitted next to each other. Extra optional colours ensure our range is widely applicable to furniture, dressing rooms and other applications.

FURNITURE HARDWARE FOR WOODEN PANELS

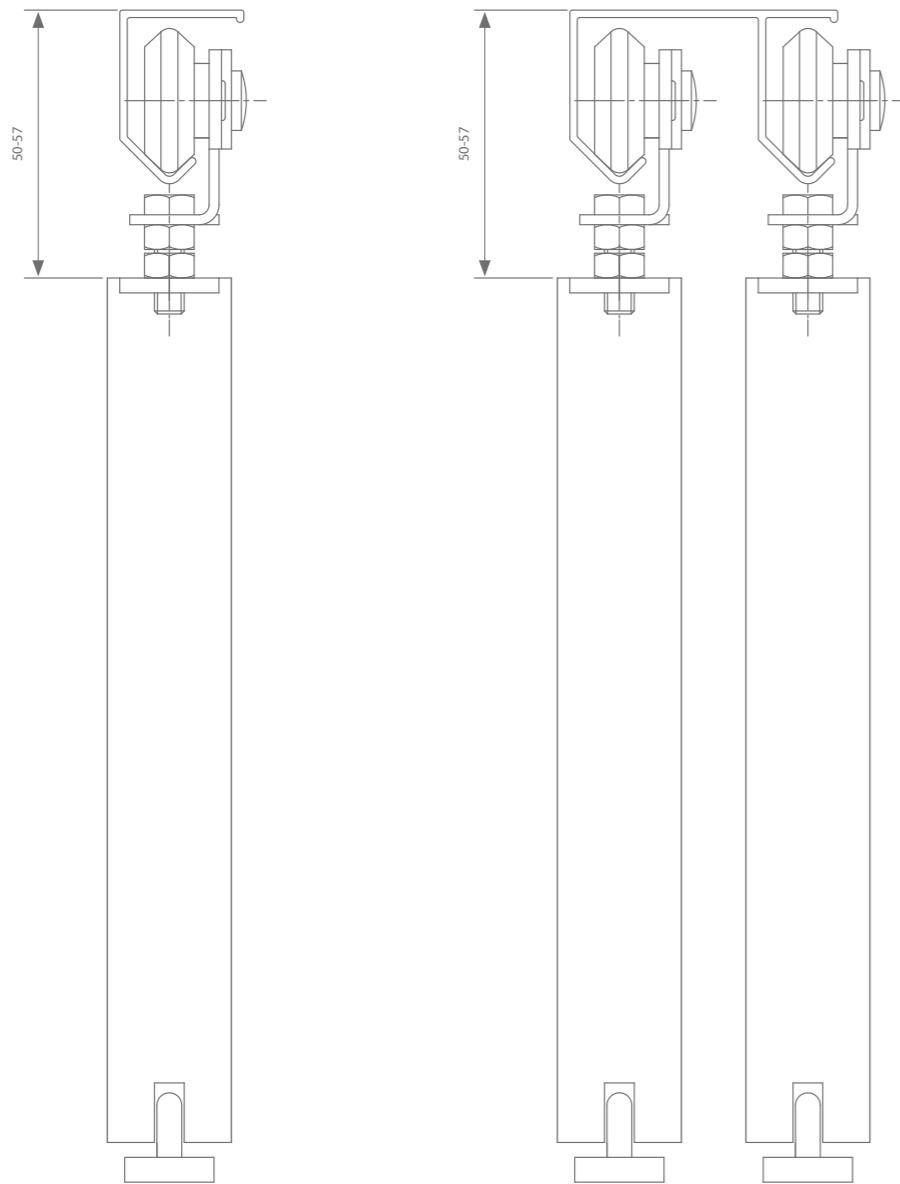

argenta
550/560.000

The tracks used are made of either aluminium or galvanised sheet steel. A variety of single or double tracks are used to slide the doors together. The rollers in this series, are single – up to max. 20 kg per leaf – or double rollers up to max. 30 kg per leaf. They are mounted on the top edge of the doors using support plates. The rollers on ball bearings are made of plastic and are especially smooth. An alternative form of rollers for lateral mounting for panels from 18 to 48 mm is also available.

SPRINT

With this system, cabinet doors weighing up to 35 kg per panel can be finished in a minimalist way using a built-in top track. A bottom guide system behind the door for up to two panels sitting in front of each other or a smaller bottom guide system complete this invisible fitting. Silent operation combined with an invisible soft close guarantee an extremely comfortable experience.

FORMAT

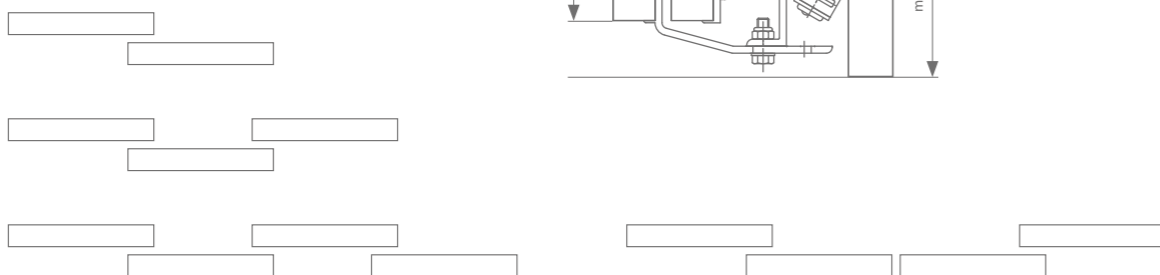

This series includes all accessories for the comfortable operation of forward-facing cabinet doors with a maximum weight of 50 kg per door. A height adjustment of 11 mm is possible, and the system can be used for panel thicknesses between 18 and 32 mm. Using a patented click system at the bottom, the cabinet doors can be single-handedly installed. The Format cabinet door hardware is our high-quality range, with attention being paid to design and sustainability. The hardware is hidden, making it seem like the doors are 'floating'.
